## PROFESSIONAL EXPERIENCE

**DevOps Engineer | [HCL Technologies, Nagpur] | [February 2023 – Present]**

- Maintained CI/CD pipelines for application build, testing, packaging, and deployment.
- Supported AWS infrastructure, Linux systems, and application environments.
- Investigated deployment failures and production incidents; documented root causes and preventive actions.
- Collaborated with developers, QA, and operations teams to coordinate releases.

## PROJECTS

### CI/CD Pipeline Standardization

Built and maintained CI/CD pipelines to automate build, test, image publishing, and deployment stages. Added validation and clear failure reporting to improve release consistency.

### Kubernetes Application Delivery

Supported deployment and troubleshooting of containerized workloads using Kubernetes manifests/Helm, probes, resource requests, and environment-specific configuration.

### Infrastructure as Code

Used Terraform to provision or update repeatable cloud resources, with code review and environment separation.
